Dear Child Care Provider,

The Sabre Companies proudly introduce a totally new line of quality infant/toddler products to solve the greatest challenge in group care of young children — maintaining a safe and sanitary environment. Communicable disease is a major threat to children in child care and can impact not only the children, but the child care providers, the families, and even the larger community.

**The Hatteras Collection** is designed to separate diapering, food preparation, and general handwashing by forcing a distinct separation of these tasks. Caregivers want to do what is right, and our products make it easier for them to follow best practice.

Our products adhere to the *National Health and Safety Performance Standards: Guidelines for Out-of-Home Child Care Programs* (a joint publication of the American Academy of Pediatrics and the American Public Health Association).

North Carolina hosts the National Training Institute for Child Care Health Consultation. The N.C. Division of Public Health has the most extensive curriculum to prepare child care health consultants in the country. Our company benefits by working with these state and national programs and can now produce products that make a difference — products that make healthy child care a reality.

**The Hatteras Collection** reflects the value our company places on safety and health. We hope you like our products and look forward to working with you to create safer and healthier environments for young children.

Sincerely,

William C. Walton III  
President and CEO
